WOODLAWN NURSERIES.

1905

AFR
ROCHESTER, N. Y.

We have so much express that the Adams, American, National, United States and Wells, Fargo & Co. Express Companies send their wagons out to our grounds each day for it.

SUITABLE DISTANCES FOR PLANTING

Apples, Standard,	30 to 40 feet	Grapes	8 by 10 feet
Apples, Dwarf	8 to 10 "	Currants	3 by 5 "
Pears, Standard	18 to 20 "	Gooseberries	3 by 5 "
Pears, Dwarf	10 "	Raspberries, Red	3 by 6 "
Peaches	16 to 18 "	Raspberries, Black	3 by 6 "
Nectarines and Apricots	16 to 18 "	Blackberries	5 by 7 "
Cherries, Sweet	18 to 20 "	Strawberries, rows	1 by 3½ "
Cherries, Sour	15 to 18 "	Strawberries, in beds	1½ by 1½ "
Plums	16 to 20 "	Asparagus, in beds	1 by 1½ "
Quinces	10 to 12 "	Asparagus, in field	1 by 3 "

NUMBER OF TREES OR PLANTS ON AN ACRE

2 feet each way	10,890	15 feet each way	194
3 " " "	4,840	18 " " "	135
4 " " "	2,723	20 " " "	110
5 " " "	1,742	25 " " "	70
6 " " "	1,210	30 " " "	48
8 " " "	680	33 " " "	40
10 " " "	430	40 " " "	28
12 " " "	302		

To ascertain the number of plants required to the acre at any given distance, divide the number of square feet (43,560) in an acre by the number of square feet you desire to devote to each plant. For instance, in strawberries planted 1½ by 3 feet, each hill will occupy 4½ square feet, making 9,680 plants to the acre.

No. 18

STATE OF NEW YORK

DEPARTMENT OF AGRICULTURE

CERTIFICATE OF INSPECTION OF NURSERY STOCK

This is to Certify that the stock in the Nursery of Allen L. Wood, of Rochester, County of Monroe, State of New York, was duly examined in compliance with the provisions of Chapter 519, of the laws of 1902, and it was found to be apparently free in all respects from any contagious or infectious plant disease or diseases, or the San Jose scale, or other dangerously injurious insect pest or pests.

Dated, Albany, N. Y., Sept. 1, 1904.

C. A. WIETING, *Commissioner of Agriculture.*

TWENTY-NINTH ANNUAL CATALOGUE OF Small Fruits, Fruit Trees, Roses ETC.

ALLEN L. WOOD

ALLEN L. WOOD grows and sells more Nursery Plants

than any other Nurseryman in the World 🌿🌿🌿

THE REASON THE ALLEN L. WOOD NURSERIES ARE FAMOUS all over is because of the high and superior bearing quality of its plants.

☞ If we could show you the difference between our plants and those of other Nurserymen, and the grade of plants we send out, you would understand why ALLEN L. WOOD'S plants are the cheapest to buy.

Best Plants in the World

☞ This is a matter which the fruit grower cannot afford to overlook. Your profits depend almost entirely upon the plants which you start. You cannot grow good fruit from poor plants--you cannot grow big crops from weak plants. Don't try to save a few cents and ruin your whole crop. Remember, do not postpone writing us until you can order big. One Nurseryman says, "I do not care for small orders," but that nurseryman is a competitor; and our book shows that we had over 5000 orders last year for less than \$5.00. *Starting right is more important than starting big.*

ALLEN L. WOOD

Wood Quality

Fruit Growers Say Wood's Plants are the Best in the World
Because They Yield Superior Fruit

It is not enough to know that plants grown from weak plants will also be weak, but the point is **WHAT WILL THEY PRODUCE?**

OUR NURSERIES

We are the largest growers of Small Fruit Plants in the world. A complete assortment of standard varieties of Strawberries, Raspberries, Blackberries, Currants, Gooseberries, Grapes, etc.

OUR PLANTS

We grow all our own plants, on the best soil in the United States, which makes them extra strong and well rooted, and now offer the largest and finest stock of plants we have ever grown.

OUR PRICES

have been carefully adjusted, are as low as those offered by other firms, and in many instances our immense stock and complete equipment enables us to make lower rates than can be procured elsewhere on same grades.

OUR GUARANTEE

Our plants are warranted true to name, and of grade represented. Should any stock not prove true to name, we will either refund the purchase money of same, or replace the stock true to name, free; but are not liable for further damages; and while we exercise great care to prevent mixture, the above is to be the condition on which all stock is sold.

WE WISH TO CALL YOUR ATTENTION TO OUR SPECIAL BARGAIN OFFER ON COLORED INSERT. We want you to try our stock **ONE YEAR** and we can convince you that you have at last found where to **BUY HONEST PLANTS** at **HONEST PRICES.**

Way to England, 3768 Miles

Plants arrived O. K. and are now growing **FINELY** in their **NEW HOME** far from their native land.
Newburgh, Eng. H. B. MACHEN.

56 Instead of 48

The plants arrived in good condition, **56 OF THEM INSTEAD OF 48.** They are doing **VERY WELL**, indeed. I thank you for the attention.
Philadelphia. H. HARRIS.

REMITTANCES should be made by Post Office or Express Money Order or Registered Letter.

HOW TO ORDER

Always use the order sheet in Catalogue in making out your order. Be sure to fill out the order sheet, whether you wish it sent by mail, express or freight, and be sure to sign your name and give post office address.

PLANTS BY MAIL

We can send plants by mail to any part of the country, and will guarantee them to reach customers in good condition.

BY EXPRESS OR FREIGHT We deliver plants to express or railroads free, and the purchaser pays all express charges on receipt of goods. We pack all orders free. All express companies send their wagons to our packing houses once a day for our express. If plants are shipped C. O. D., one-fourth the amount of bill must be sent with order.

LOW EXPRESS RATES

The express companies now carry trees and plants to any part of the country at a reduction of 20 per cent. from regular merchandise rates.

Excellent Stock

We wish to thank you for the **EXCELLENT STOCK** you sent us. It was received in the **VERY BEST** condition.
Polk Co., Iowa. J. W. HILL.

Largest and Best Roots

Plants arrived in **SPLENDID** condition. They were the **LARGEST** and **BEST ROOTS** we have ever received from any nurseries.
Ohio. WM. SWINGLE & SON.

WE offer for Spring, 1905, only the **very best varieties that are grown.** We try the new kinds ourselves and select the **best**, discarding all others without offering them promiscuously to the public, thus protecting our friends. You can depend on every variety we offer being good and just as represented. **Get the best. It costs no more.** We have built up a good business by sending out the best stock, **true to name**, that has made our customers money and friends for us.

Our Strawberries are all from New Beds, and are Strong and Well-Rooted Plants

At dozen prices we prepay postage; at hundred prices, if customers want them sent by mail or express prepaid, **add 20 cents per 100; 50 plants at 100 rates; 500 at 1000 rates.**

CLIMAX

Climax, New, Per.—This grand new Strawberry originated with Henry W. Graham, Md. Cross between Bubach and Hoffman. In 1900 he had **1,100 plants**, which he set on less than a quarter of an acre. In 1901 he shipped **6,300 quarts**, or about **20,200 quarts to the acre.**

In 1903, Mr. J. F. Jester, one of Delaware's largest strawberry growers, picked from a plot **9 x 15 feet 78 quarts**, which sold for **\$4.68**, or at the rate of **25,166 quarts per acre, or \$1500.** This sounds like a fairy tale, but Mr. Jester is an honest and honorable old gentleman and has no interest in this grand new berry except his love for growing fine berries.

The **Climax** ripens a little later than Michaels Early. We would advise all our patrons to **give it a trial**, if only a dozen plants. **Price, 35c. per dozen, 75c. per 100, \$5 per 1000.**

STEVENS' LATE CHAMPION

Stevens' Late Champion, Per.—Originated in New Jersey. Plants of more than ordinary vigor; a good runner; perfectly healthy; color bright. A fine looking berry. Ripens after most other varieties have gone. We consider it the best late strawberry we grew last season. Any one who wants a good, late kind should plant **Stevens' Late Champion**, as it is properly named. **Price, 35c. per dozen, 75c. per 100, \$5 per 1000.**

Bubach, Imp.—Fruit large, handsome, roundish conical, bright scarlet, moderately firm, of fair quality; plant a strong grower, with large, healthy foliage, very productive; succeeds on light or heavy soil. Desirable for home use and near-by market. Has proved one of the best Strawberries. Season early to medium. **Price, 25c. per dozen, 50c. per 100, \$3 per 1000.**

**Don't miss our Bargain offers
They are Money Savers!**

Brandywine, Per.—Plants vigorous, large, healthy, hardy and productive. Berries large, roundish conical, regular; uniform in size, handsome in color, excellent in quality. Grown for market or home use will be found in front rank of higher grade berries. **Price, 25c. per dozen, 50c. per 100, \$3 per 1000.**

OLYMPIA

Olympia, New, Per.—Originated in California. This is the most remarkable Strawberry to **endure drought** we have ever grown. In 1903 we had sixty-five days without rain and this was the only Strawberry that remained **fresh and green and bore a full crop**, while all other kinds were badly dried up. It is being planted very largely in California. **The root of the Olympia penetrates into the ground deeper** than any other Strawberry we have ever grown. Strong, robust grower; very productive. Fruit medium to very large. Fruit stalks exceedingly stout. Ripens mid-season. Will do well on light dry soil. **Price, 50c. per dozen, \$2 per 100.**

Beder Wood, Per.—Large, roundish, conical, bright scarlet, moderately firm, fair quality. A very heavy bearer. This berry, all things considered, is the best early berry we have ever fruited for market. **Price, 25c. per dozen, 50c. per 100, \$3 per 1000.**

Echo, Per.—Introduced by us. This great table berry has the highest and richest flavor, the natural Wild Strawberry, and quite unknown among native varieties. It is very productive, fruit large, and most delicious for family use. **Price, 35c. per dozen, \$1 per 100.**

Armstrong, Per.—(A German Seedling.) This variety came from Germany about ten years ago. It has been controlled by three or four German fruit-growers.

We have been watching this new German berry for the past few years. It is the largest and most productive berry grown. We have seen several crates with 10 to 12 berries to a quart box. They sold on the market for 10 to 15c. per quart, while other berries sold for 4 to 6c. From medium to late. It needs no fertilizing. **Price, 35c. per dozen, 75c. per 100, \$5 per 1000.**

Glen Mary, Imp.—Very vigorous, enormously productive, of large to very large, bright, deep red berries. Yellow seeds on surface; flesh very firm; light red clear to the center; sweet, rich and high flavored; fine form, bright color, firm and good quality. **Price, 25c. per dozen, 50c. per 100, \$3 per 1000.**

Early Beauty—This new berry originated in Iowa. It is claimed to be extra early. Very large, fine flavor and very productive. Plants make a vigorous growth and are free from all blight and rust. Growers in Iowa speak well of this variety. **Price, 35c. per dozen, \$1 per 100.**

Nick Ohmer, Per.—A fine, fancy market berry and always superb for the table. A giant in size; it is deep red all through, globular, high-flavored, delicious. In healthy vigor and fruitfulness unsurpassed by any other sort. **Price, 30c. per dozen, 50c. per 100, \$4 per 1000.**

Palmer Early, Per.—The largest and most beautiful of all early Strawberries, perfect bloomer, plants strong and robust, produces two and four fruit stalks to each plant, all well filled with large berries. **Price, 35c. per dozen, 75c. per 100, \$5 per 1000.**

SENATOR DUNLAP

Senator Dunlap—Season early to medium. Popular market sort. It withstands all conditions of weather beyond the average. Very productive, dark red through and through. If you want a variety that will give you good returns **do not fail to plant the Senator Dunlap.** **Price, 25c. per dozen, 50c. per 100, \$3 per 1000.**

Earliest, Per.—It is considered valuable on account of its earliness. More productive than Michaels Early and larger. **Price, 25c. per dozen, 50c. per 100, \$3 per 1000.**

Tennessee Prolific, Per.—Very productive, medium to large, bright scarlet and fine quality. Ripens early to medium, good market or family berry. Does well on light soil. **Price, 25c. per dozen, 50c. per 100, \$3 per 1000.**

SAMPLE

Sample, Imp.—This new Strawberry has proven all the originator claimed for it. It is a fine berry of very large size, long in bearing, solid and good. The illustration was drawn direct from a specimen berry. It is quite late to ripen, large to very large in size, crimson color to the core. Very fine for a large berry; strong, vigorous and healthy foliage. Sample is of large size and fine quality, quite firm and continues a long time in fruit. It will yield as many berries as Haverland and average as large as Bubach. Not a weak spot in it. Needs no petting. **Price, 25c. per dozen, 50c. per 100, \$3 per 1000.**

Kansas, Imp.—Very vigorous grower, free from rust or disease, has a strong strawberry flavor. Very popular for canning, ripening late, size medium to large. **Price, 25c. per dozen, 50c. per 100, \$3.50 per 1000.**

Ryckman, (or \$100.00,) Per.—This new variety is very highly spoken of by all who have tried it. The plants make a strong growth, free from rust. The originator claims for it superb flavor, size, color, shape and firmness. Heaviest yielder of the giant sort. If it is half as good as they claim it is, it is certainly worthy of a careful trial by everyone. **Price, 50c. per doz., \$2 per 100.**

WM. BELT

Wm. Belt, Per.—A well tested variety that is giving remarkable satisfaction as a large, handsome, productive berry for market or home use. Vigorous, thrifty, heavy plant, producing large crops under good, common culture. Berries extra large, conical, quite uniform in shape; brilliant, glossy red; ripens all over without green tips; good quality; carries well to market and brings highest price. **Price, 25c. per dozen, 50c. per 100, \$3 per 1000.**

Additional Varieties too well-known to require separate description. **Crescent, Gandy, Haverland, Jessie, Lovetts, McKinley, Michaels Early, Seaford and Wilson.** **Price, 25c. per doz., 50c. per 100, \$3 per 1000.**

\$40 TO \$100 PIN-MONEY.

RAISING STRAWBERRIES

MY way of making pin-money is by raising strawberries. I set out a bed of from three hundred to one thousand plants, doing all the work myself except preparing the ground. I keep it cultivated with a garden-cultivator and hoe. When runners start, I see that they are properly covered to root, and when fall comes a fine strawberry bed is ready for bearing another year. When it freezes up, my husband covers the bed with a straw mulch. In spring the mulch is removed, and in two months the reward will come in the shape of large luscious berries which sell in town faster than you can hand them out. I am a farmer's wife, with six in the family. I do my own work, care for the poultry, garden, etc., yet find plenty of time to care for my strawberry bed, which nets me from forty dollars to over one hundred dollars, according to the size of the bed, and will continue to bear good crops for three years without much work, when a new one should be set out. I live four miles from town, the population of which is about 600. I get from twelve and one-half to fifteen cents a quart for the berries. I could always sell more if I had them. To any woman who has from one-fourth of an acre to an acre of ground there is no easier way of earning pin-money than by raising strawberries. It requires but a small outlay of money—1000 plants costing from \$3 to \$5. The cost of boxes is very slight. My children help me pick the berries, and I deliver them myself. MRS. M.

Strawberry Bargains! Colored Sheet!

THERE are two general types of Raspberries, and they require different treatment. Blackcaps, which increase from the ends of the canes, should be planted three by six feet. Prepare the land same as for Strawberries. Cultivate often enough to keep the soil loose and free from weeds. When the canes attain the height of one foot, pinch off the ends; this causes the canes to branch, grow stocky and self-supporting. In the spring cut these branches back to within six inches of the main stalk. After fruiting cut out all the dead wood. Red Raspberries should be set six by three feet apart. Allow only three or four canes in each hill to grow. When three or four feet high pinch back the canes, same as with Blackcaps. The secret of raising fine crops of Raspberries is in rigorous pruning and keeping suckers down. If not checked, the tendency is to mat the surface with canes, when very little fruit is secured. For garden culture the red varieties may be set three feet apart each way; Caps, four by three feet.

NOTE—If you want them sent by mail or express prepaid, add 12c. per dozen, 40c. per 50; six at dozen rates, 50 at 100 rates, 500 at 1000 rates.

RUBY

Ruby, New—This new berry is just what fruit growers have been looking for. In the Ruby we have earliness, vigor, hardiness, large size and very productiveness. Qualities that will give it a foremost rank. It resembles the Marlboro in color of fruit but is a stronger grower.

C. G. Vellie & Son (Fruit Growers) in introducing this berry say: "The **Ruby** Raspberry is a seedling of the well known Marlboro variety. It partakes of its parent in its habit of growth, but is much more hardy and vigorous. Canes growing six or more feet in height with a good strong foliage. The fruit is born in great quantities, a very prolific bearer and of large size, a good bright

color and firm. An excellent shipping berry. It has proved itself to be the most profitable sort wherever tried. Ripens with the earliest." **Do not fail to plant the Ruby. Price, 15c. each, 2 for 25c., \$1 per dozen, \$4 per 100, \$30 per 1000.**

Hear What the Large Fruit Growers Have to Say About It

ULSTER CO., N. Y., Nov. 1, 1904.

Dear Sirs:—I have a patch of **Ruby** Raspberries that came in bearing for the first time this season. I consider them the best producer and shipper in our section.

Yours respectfully,
CHAS. YOUNG.

ULSTER CO., N. Y., Nov. 10, 1904.

Dear Sirs:—I have fruited the **Ruby** berry and consider it the very best variety that I have seen. They are beautiful in color, large in size, bear in abundance, very early in the market, pick longer than any other variety and always first in price.

W. H. TOWNSEND.

ULSTER CO., Nov. 8, 1904.

Dear Sirs:—After having fruited the **Ruby** with the Marlboro one year I believe it to be a better berry. It has all of its good qualities and is much healthier.

G. G. FOWLER.

ORANGE CO., N. Y., Nov. 10, 1904.

Dear Sirs:—We have grown the **Ruby** Raspberry for the past two years and find it a prolific bearer. The canes grow large and healthy. The fruit is very large and ships exceedingly well, being very firm. Think it a very valuable market berry as it starts to ripen ahead of any other variety and continues through a long fruiting season.

WM. C. YOUNG & SON.

DISH OF WOOD'S IMPROVED CUTHBERT

Cuthbert, Wood's Improved—Has excelled all other late varieties of Red Raspberries. For the past ten years I have propagated it from my very best bushes, and now have Cuthberts far ahead of the average. One fruit-grower who saw my fruit in 1901 ordered 30,000 plants of me the next year. If you need Raspberry plants it pays to buy the very best stock. The Cuthbert is the leading market variety all over the country. Remarkably strong, hardy variety; stands Northern winters and Southern summers equal to any. Berries very large, measuring three inches around; conical, rich crimson, very handsome; so firm they can be shipped hundreds of miles in good condition; flavor sweet, rich, luscious. **Price, 5c. each, 30c. per dozen, \$1 per 100, \$7 per 1000.**

Loudon—A red mid-season berry. Large fruit, beautiful, rich dark crimson color, good quality, enduring winter without protection and without injury to the very tips. It stands shipping the best of any variety, and will remain on bushes the longest without injury. **Price, 8c. each, 60c. per dozen, \$2 per 100.**

Marlboro—Large size, light crimson color, good quality and firm. Vigorous and productive. One of the best, well tested, large early berries for the North. **Price, 5c. each, 40c. per dozen, \$1.50 per 100, \$10 per 1000.**

Golden Queen—Yellow Variety—This variety is almost identical with Cuthbert, except in color. Fruit large, productive; quality first-class. It is beyond doubt the finest and most profitable yellow berry grown. **Price, 7c. each, 50c. per dozen, \$1.50 per 100.**

Schaffer—This is the best known of the purple Raspberries. It is very vigorous, large and productive. It picks easier than Columbian, but is not so large or firm. **Price, 5c. each, 35c. per dozen, \$1.00 per 100, \$8 per 1000.**

Haymaker—An Ohio seedling of the Schaffer and Columbian type. Fruit a little more acid and later than either. Fruit drops off badly when over ripe. **Price, 8c. each, 60c. per dozen, \$2 per 100.**

DON'T FAIL to Read Raspberry Bargains on Colored Insert

A BIRD'S-EYE VIEW OF A PORTION OF TWENTY ACRES OF COLUMBIAN RASPBERRIES BOUGHT OF ALLEN L. WOOD IN THE SPRING OF 1902. PHOTOGRAPHED IN AUGUST, 1903

Columbian—This great berry is believed to be a cross between Cuthbert and Gregg, and is superior and larger than Schaffer, which it resembles in type and color. We recommend it for all garden and general planting. For canning purposes it is undoubtedly the very best Raspberry in cultivation, yielding as high as 8,000 quarts per acre. Unlike some kinds, it does not go to pieces in the process of canning, and does not shrink. It is very popular and is known from Maine to California. A dozen strong plants will supply a family with fruit, as it grows from eight to twelve feet high, and in fruiting season its branches are covered with fine, large crimson berries. Perfectly hardy, and grown largely for evaporating, retaining color, form and flavor remarkably. **Price, 5c. each, 35c. per dozen, \$1.25 per 100, \$10 per 1000.**

BLACK RASPBERRIES

Mills (The Mortgage Raiser) —The demand for Mills for the past three years has been greater than the supply. It seems impossible to grow enough plants for the demand. We consider it the best Black Raspberry we have ever grown. It is perfectly hardy, extremely large, large as the Cumberland, very firm. It is the most productive of all Black Raspberries we have tried. It brings the highest price of any in the market. It has given such immense

satisfaction to the fruit growers in Western New York that it is almost impossible to buy any plants from fruit growers who have it. **Price, 8c. each, 60c. per dozen, \$2 per 100, \$15 per 1000.**

Kansas—This most rampant grower is everywhere considered the best midseason blackcap. Branches freely, is healthy and hardy; produces very large, glossy, jet black berries of excellent quality for home use or market. **Price, 5c. each, 40c. per dozen, \$1.50 per 100, \$10 per 1000.**

KANSAS

Black Diamond—This variety is fast becoming a favorite. For the past two seasons we have not had near enough plants to supply the demand. It is one of those varieties that the more you get of it the more you want. Makes strong, vigorous canes with numerous side branches all thickly set with fruit spurs. Berries about size of Gregg, ripen early; the sweetest berry known. Fine flavor, pulpy, and with few seeds, yet firm enough to be an A No. 1 shipper. For drying and evaporating it excels all others. The dried fruit is jet black, retains the richness, fine flavor and sweetness of the ripe fruit. **Price, 8c. each, 60c. per dozen, \$2 per 100, \$15 per 1000.**

Cumberland—A mammoth mid-season blackcap that loads its stout, stocky canes with handsome fruit. Its great, glossy berries outsell all others of their season, are firm enough to ship well and of good quality. In hardiness and productiveness among the best. **Price, 8c. each, 60c. per dozen, \$1.75 per 100, \$12 per 1000.**

Gregg—Very best of blackcaps, very large, wants good soil, fruit very fine and covered with bloom. Leading market variety all over the country; best for evaporating as it is said to yield most. **Price, 5c. each, 40c. per dozen, \$1.50 per 100, \$10 per 1000.**

NUMEROUS RASPBERRY BARGAINS ON COLORED SHEET

BLACKBERRIES

This excellent and profitable fruit should be planted for garden use in rows about five feet apart, and four feet in rows. For market in rows six feet apart and four feet in rows. Give the plants same cultivation as Raspberries.

NOTE—If you want them sent by mail, or express prepaid, add 12 cents per dozen, 40 cents per 50; six at dozen rates, 50 at 100 rates, 500 at 1000 rates.

RATHBUN

Rathbun—The plant is very vigorous, branching naturally, producing fruiting canes very freely and an abundance of large, luscious fruit. It "suckers" but slightly, the roots are strong and branching, penetrating deeply into the soil, a valuable characteristic in dry seasons and locations. The fruit is very large and handsome, intense black with a very high polish and without any hard core, juicy, high-flavored; of so superior a quality that it is in a class by itself. For table, for canning or for culinary

purposes it is equally desirable. It literally melts in the mouth. **Price, 8c. each, 60c. per dozen, \$2 per 100, \$15 per 1000.**

Snyder—Very popular for the North and Northwest on account of its extreme hardiness; wonderfully productive, size medium, fruit juicy and sweet without the hard core of many sorts; canes remarkably strong and thrifty. More largely planted than any other of the ironclad varieties. **Price, 5c. each, 35c. per dozen, \$1.50 per 100, \$10 per 1000.**

BLOWERS

Blowers—This new berry originated with Mr. Blowers, Chautauqua Co., N. Y. We have made arrangements with him to offer it to our customers. The Blowers is the giant of all Blackberries. It grows 14 feet high and is enormously productive, 2694 berries on one bush, largest of all blackberries. Bushes are so tall, large and strong that they can carry a great crop. It is the ironclad variety, never winterkills. Record for 1904 from 1-4 acre, 2347 qts., net price \$264.04 at the rate of \$1,056.16 per acre. One plant is enough for a family garden. Price, 25c. each, 6 for \$1, \$2 per dozen.

What Hon. John S. Lambert, Supreme Court Judge, says about the Blowers Blackberry: "I saw a sample Blackberry bush known as the 'Blowers Blackberry' something over 13 feet high and loaded with the most delicious fruit I ever saw. It was a surprise both in the size of the bush and berry, as well as quantity of fruit, as I had never seen or heard of anything that approached this display. In my opinion it will absorb all other varieties."

Early King—An extra early and exceedingly hardy variety of great merit. Canes of strong growth, as hardy as Snyder, and very prolific. It is larger and earlier than Early Harvest, and its delicious sweetness renders it of special value for the home garden. It has been thoroughly tested in the North, and has given very general satisfaction. Highly recommended by the experiment stations. Price, 7c. each, 50c. per doz., \$1.50 per 100, \$12 per 1000.

Minnewaski—One of the largest and most productive; on trial several years and receives most favorable reports from nearly all sections. Fruit glossy black, tender, juicy, sweet, fine aromatic flavor. Remarkably productive and hardy. One of the best for market and home garden; early. Price, 8c. each, 60c. per dozen, \$2 per 100, \$15 per 1000.

Ohmer—As large as the largest, of best quality, as hardy as any good berry and very productive. A valuable late market sort. Price, 8c. each, 60c. per dozen, \$2 per 100.

Early Harvest—A strong healthy grower; very early; productive; fruit medium size, bright, glossy, black; good shipper. Best on sandy soil. Price, 5c. each, 35c. per dozen, \$1.25 per 100, \$8 per 1000.

Eldorado—Hardy as Snyder, larger berry, best quality. Cultivated twelve years and never winter killed. H. E. VanDeman, National Pomologist, says: "Never have I tasted anything equal to Eldorado." We have fruited it and find it hardy and fine. Our first stock was bought of originator. Price, 8c. each, 60c. per dozen, \$2 per 100.

Erie—One of the strongest growers, will produce large crops on poor soil. Fruit of largest type, very uniform, and perfect. Price, 5c. each, 35c. per dozen, \$1.50 per 100, \$10 per 1000.

Iceberg—A novelty from California; white berries; 10c. each, 60c. per doz.

Additional Varieties—Lovetts, Stone Hardy, Ancient Briton, Taylor and Wilson. Price, 5c. each, 35c. per dozen, \$1.50 per 100.

SEE OUR COLORED INSERT FOR BARGAINS

CHOOOSE a moist, rich soil for Currants. Plant four by five feet apart. Keep free from weeds and grass by cultivation and mulching. Use plenty of manure and trim out superfluous wood by cutting back the new growth two-thirds each year. Sprinkle ashes around the roots occasionally to keep out borers. If Currant worm appears, dust with Hellebore.

NOTE—If you want them sent by mail or express prepaid add 12 cents per dozen, 40c. per 50, six at dozen rates, 50 at 100 rates, 500 at 1000 rates.

Perfection

—This grand New Currant originated by a fruit grower near Rochester, N.Y. A cross between the Fay and White Grape. Awarded the Barry Medal—the fifty dollar gold medal of the Western N. Y. Horticultural Society, July, 1901, after three years' trial. First fruit to receive this grand prize. Also received highest prize given any new fruit at the Pan - American Exposition. Is very highly endorsed by Prof. S. A. Peach, Horticulturist of N. Y. State Agricultural Experiment Station

PERFECTION

at Geneva, after four years' trial there in competition with sixty varieties. Color, bright red; larger than Fay; rich, mild, sub-acid, with few seeds and good quality. To protect customers from imposition, the originator is sending out the Perfection under seal. See that each plant bears it. We are one of the very few Nurserymen having the right to sell Perfection. **Price, 50c. each, \$5 per dozen.**

Pomona—A vigorous and robust grower, healthy, hardy and an early bearer; foliage abundant and remains on the bush much longer than other sorts. The fruit is very beautiful in appearance, of a clear, bright, translucent red; bunches large and full, and berry is very nearly as large as the Fay. It is of remarkably fine quality, sweet and

POMONA

mild, and less acid than any we know of, with very few seeds, which are small. The fruit is so bright-colored and handsome that it always attracts buyers at market, and not only hangs on the bush well after ripe, but will also keep in good condition a long time after being picked. It bears regularly year after year with the same unflinching abundance, and its immense yield, attractive appearance and fine quality make it the most profitable and desirable of all Currants. **Price, 8c. each, 60c. per dozen, \$3 per 100, \$25 per 1000.**

Good Currants at unheard of prices. See colored sheet.

Red Cross—Greatest of all currants. *Rural New-Yorker* says: "Red Cross is the best of all old or new currants for mid-season." N. Y. Experiment Station says it is large and productive. The masses of fruit were so dense as to completely hide the bearing canes from view. Jacob Moore says this is a peculiarity of the Red Cross. I have cut off some of the branches thus heavily laden and sent them to the Rural New-Yorker, Country Gentleman, as well as to leading pomologists. These people have said they never saw anything to equal the Red Cross as shown by specimen branches. E. W. Reid says he is remarkably impressed with this variety, especially for its large size and productiveness, it being much superior to Fay's in every respect. I have picked stems of this currant seven inches long with 23 to 26 currants upon a single stem. It is the most vigorous grower of all currants I have tested. It seems as though this variety would create an epoch in currant growing. You can not make any mistake in planting the Red Cross Currant. The plants I offer are well rooted and very strong. Now is a good time for planting currants, gooseberries and raspberries, as well as many other varieties. Strong plants, 8c. each, 65c. per dozen, \$3.25 per 100, \$27.50 per 1000.

Cherry—Strong grower, fruit very large, sometimes measuring one-half inch in diameter. Should have good soil and thorough cultivation. Price, 8c. each, 60c. per dozen, \$3 per 100, \$25 per 1000.

Lee's Prolific (Black)—Considered one of the best black Currants. Fruit large; produces abundantly. Never attacked by insects of any kind. Valuable for making jellies, jam and wine. Price, 10c. each, 75c. per dozen, \$3.50 per 100, \$30 per 1000.

See colored sheet! Bargains!

Fay's Prolific—Perhaps no other Currant has received so much praise as Fay. It is very large and always sells well and at a high price. We consider it does better on heavy clay soil, well manured, and thoroughly cultivated, than on lighter soil. **Price, 8c. each, 60c. per dozen, \$3 per 100, \$25 per 1000.**

Pres. Wilder—This variety is very popular with fruit growers. One of the strongest growers and most productive. Bunch and berries very large, bright, attractive red color, even when dead ripe; hangs as late as any known variety. Compared with Fay's is equal in size, longer bunch, better quality, much less acid;

ripens at same time, much longer on bush, fully as prolific. Strong plants. **Price, 10c. each, 75c. per dozen, \$3.50 per 100, \$30 per 1000.**

White Grape—The largest and most productive white currant grown. Flavor sweet and very fine for the table. Not desirable for the general markets because people don't seem to take to white fruits. The best table currant. **Price, 10c. each, 75c. per dozen, \$4 per 100.**

We also have these additional varieties: LaVersailles, Prince Albert, North Star, Victoria, Red Dutch, Black Champion, and Black Naples at **7c. each, 60c. per dozen, \$3 per 100, \$25 per 1000.**

Extra money's worth in our special Bargain. See colored sheet

PLANT same as Currants, in good, rich soil; give liberal dressing of manure every season. Regular pruning every year is essential for fine fruit. To prevent mildew, spray as soon as leaves appear, and often in summer with potassium sulphur, one ounce to four gallons water.

NOTE—If you want them sent by mail, or express prepaid, add 12 cents per dozen, 40 cents per 50; six at dozen rates, 50 at 100 rates, 500 at 1000 rates.

Downing—One of the oldest and best. Large, handsome, pale green, of splendid quality, for both cooking and table use. Vigorous grower and usually free from mildew. **Price, 10c. each, \$1 per dozen, \$5 per 100.**

Houghton—A very productive, hardy berry, of medium size, and for general purposes one of the best. **Price, 10c. each, 75c. per dozen, \$3.50 per 100.**

Industry—An English variety. It is very popular in England. Fruit is large size, color dark red. The best of all English varieties in this country. **Price, 15c. each, \$1.50 per dozen, \$10 per 100.**

Pearl—Best American variety—a cross between Houghton and a large English variety; very hardy, free from mildew, superior in size and quality, and more productive than Downing; is likely to supersede this standard sort. From many flattering testimonials we take pleasure in recommending this variety as one of the best. **Price, 10c. \$1 per dozen, \$5 per 100.**

Red Jacket—An American seedling of large size; smooth, prolific and hardy, of best quality. Well tested over a wide extent of territory with all leading varieties. A wonderful cropper; bright, clean, healthy foliage. **Price, 10c. each, \$1 per dozen, \$7 per 100.**

Garden Roots

Rhubarb (Myatt's Linnæus)—Early, tender and very large; known as the sweetest of pie-plants. **Price, 10c. each, 75c. per dozen, \$3 per 100.**

Extra large, for forcing, 25c. each, \$2 per dozen.

Horse Radish—Price, roots, 25c. per dozen, \$1 per 100, \$5 per 1000.

McKinley Early Grape

Price, 50 cts. each; 6 for \$2.50;
\$5.00 per dozen.

We introduced this wonderful Grape three years ago and it has proven more than we said for it. It is a cross between Niagara and Moore's Early. Vine vigorous and healthy; productive; foliage thick and leathery. Bunches medium, uniform, compact. Skin thin, green at first and turning to yellow when fully ripe. It differs from all other grapes. The pulp has no acid and parts easily from its few seeds. It is fully ten days earlier than the Niagara, side by side. The skin has no puckery taste. It is the coming Early Grape for the market.

In order to protect our customers from unscrupulous dealers the McKinley Grape is sent out under our name. See that each vine bears our signature, on the back of each label,

Allen L. Wood

There is scarcely a yard so small, either in country or city, that room for one to a dozen or more grape vines cannot be found. They do admirably trained up to the side of any building, or along the garden fences, occupying but little room and furnishing an abundance of the healthiest of fruit.

Make the soil mellow, and plant the vines somewhat deeper than they stood in the nursery. Plant about eight feet apart by the fence or building. For vineyard, make rows ten feet apart, eight feet in rows.

NOTE—if you wish them sent by mail or express prepaid, add 12c. per dozen; 40c. per 50, six at dozen rates, 50 at 100 rates, 500 at 1000 rates.

BLACK VARIETIES

Campbells Early—Strong grower, with large, healthy foliage; productive, its keeping and shipping qualities are equalled by no other early grape. Ripens with Moore's Early, but will keep in sound, perfect condition long after that variety is gone. Bunch and berry large, glossy black, with blue bloom, sweet and juicy, seeds few and small, part readily from the pulp. Stands at the head of early black grapes for quality. Price, 15c. each, \$1.50 per dozen, \$10 per 100.

MC PIKE

McPike—This mammoth black grape has been exhibited in all parts of the country.

Its great size, fine flavor and beauty creating quite a sensation. It is a seedling of the Worden and has many of the good qualities of both Worden and Concord. The bunches are large, even and compact, the berries sometimes three inches in circumference, covered with a rich bloom; ripening evenly and keeping well. The vine is very strong and thrifty in growth with great, leathery leaves. Ripens before Concord. Price, 15c. each, \$1.50 per dozen, \$10 per 100.

Concord—The fine old market leader with large handsome cluster of large, luscious grapes, very hardy, productive and reliable. Succeeds well over a great extent of country. One of the best known grapes grown. Price, 7c. each, 60c. per dozen, \$2.50 per 100, \$20 per 1000.

Moore's Early—Bunch and berry large, round, with heavy blue bloom; vine exceedingly hardy. Its earliness makes it desirable for an early market; its hardiness particularly adapts it to Canada and northern portions of the United States. Price, 10c. each, 75c. per dozen, \$3.50 per 100, \$30 per 1000.

Worden—A seedling of Concord. Handsome, early, black, healthy, vigorous and productive, with large, longer bunches; better in quality and ten days earlier than its parent. Price, 8c. each, 65c. per dozen, \$3 per 100, \$27.50 per 1000.

Barry—Bunch large, but rather short; berries large, roundish, much like Black Hamburg; delicate, sweet and tender. Ripens with Concord. Vine vigorous and productive. One of the largest and finest of the Rogers Hybrids. Price, 15c. each, \$1.50 per dozen, \$10 per 100.

We have the following additional black varieties: Clinton, Early Victor, Ives, Wilder. Price, 10c. each, 75c. per dozen, \$3.50 per hundred.

See our Colored Insert for Bargains

RED VARIETIES

Agawam—(Rogers' No. 15)—Berries very large, thick skin, pulp soft, sweet, sprightly, very vigorous, ripensearly. Price, 10c. each, 75c. per dozen, \$ 3.50 per 100, \$30 per 1000.

Brighton—Perhaps best Red Grape in cultivation. Bunch large, compact; strong grower and very productive; quality good. Price, 10c. each, 85c. per doz., \$4.50 per 100.

Catawba—Berries large, round; dark copper color, sweet, rich, musky flavor. Requires a long season; good keeper. Price, 10c. each, 75 per dozen, \$3.50 per 100, \$30 per 1000.

Delaware—Red, finest flavor. Bunch and berry small, compact; sweet, thin skin; slow grower; requires good soil and careful handling. Price, 10c. each, \$1 per dozen, \$5 per 100.

Lindley—(Rogers' No. 9)—Bunch medium; rich shade of red; flesh tender, sweet, rich aromatic flavor. Price, 10c. each, 75c. per dozen, \$3.50 per 100, \$30 per 1000.

Alice—New Red Grape, ripens with Concord. Keeps all winter plump and fresh as when gathered without shelling or loss of flavor. Hardest in vine and fruit, strong grower, free from mildew or disease; immense yield; 40 to 60 clusters per vine; high quality, rich in sugar, has stood the test for 10 years under all conditions; is today one of the most valuable grapes before the American vineyardist. Our stock is very limited; order early. Price, 25c. each, \$2.50 per dozen.

Mr. E. S. Garman, in the Rural New Yorker

Again we may allude to the new "Alice Grape." A box was received from the originator, February 16th. The grapes were received in perfect order; the berries cling to the stems as well as when picked in October. In quality, they are free from foxiness, sweet, without acidity about the seeds, which are few.

Dr. F. M. Hexamer, Editor American Agriculturist, N.Y., writes:

"The samples of Alice Grapes arrived in excellent condition. They were tasted on March 15th, by several persons of refined taste and all declared they had never tasted such delicious grapes at this season of the year."

Salem—(Rogers' No. 53)—Bunch large, compact; berry large, round, coppery red, tender, juicy; slight pulp; one of the best. Ripens with Concord. Vine healthy, vigorous and productive. Price, 10c. each, 85c. per dozen, \$4.50 per 100.

We also have the following additional red varieties: Diana, Iona, Vergennes, Wyoming Red. Price, 10c. each, 85c. per dozen, \$4 per 100.

WHITE VARIETIES

McKinley Early Grape—See page 14

Niagara—Occupies the same position among white varieties as Concord among black; leading profitable market sort. Bunch and berries large, greenish white, pale yellow when fully ripe. Skin thin, but tough; quality much like Concord. Price, 8c. each, 65c. per dozen, \$3 per 100, \$27.50 per 1000.

Diamond—Leading early White Grape, ripening before Moore's Early. White, rich yellow tinge; juicy, few seeds, almost free from pulp; excellent quality; above medium size, adheres firmly to stem. Like Concord in growth, hardness and foliage. Fine for both market and garden. Price, 8c. each, 65c. per doz., \$3 per 100, \$27.50 per 1000.

CHOICE GRAPE VINES GOING CHEAP.
COLORS SHEET FOR VARIETIES.

Pocklington — Or "Golden Pocklington," retains its popularity, being one of the largest and most showy white grapes of the Concord type yet introduced. Price, 8c. each, 65c. per dozen, \$3 per 100, \$27.50 per 1000.

Green Mountain— (Winchell) An extra early variety from Vermont. Skin thin, pulp tender, sweet, quality superb. Bunch and berry medium size. Hardy, vigorous and productive. Price, 20c. each, \$2 per dozen.

We also have the following additional white varieties: Elvira, Etta, Duchess, Geneva, Hayes, Lady, Martha. Price, 10c. each, 85c. per dozen, \$5 per 100.

HINTS ON TRANSPLANTING, ETC.

We cannot attempt to give complete directions on all points connected with Tree Planting, but simply a few hints on the more important operations.

THE PREPARATION OF THE SOIL—For fruit trees the soil should be *dry*, either natural or made so by thorough drainage, as they will not live or thrive on a soil constantly saturated with stagnant moisture. It should also be well prepared by twice plowing, at least, beforehand, using the subsoil plow after the common one at the second plowing. On new, fresh lands, manuring will not be necessary; but on lands exhausted by cropping, fertilizers must be applied, either by turning in heavy crops of clover, or well-decomposed manure or compost. To ensure a good growth of fruit trees, land should be in as good condition as for a crop of wheat, corn, or potatoes.

STANDARD ORCHARD TREES—These, as sent from the Nursery, vary from five to seven feet in height with naked stems or trunks, and a number of branches at the top forming a head. These branches should all be cut back to within three or four buds of their base. This lessens the demand upon the roots, and enables the remaining buds to push with vigor. Cut off smoothly all bruised or broken roots up to the sound wood.

PLANTING—In the first place dig holes large enough to permit the roots of the tree to spread out in their natural position; then, having the tree pruned as before directed, let one person hold it in an upright position, and the other shovel in the earth, carefully putting the finest and the best from the surface in among the roots, filling every interstice, and bringing every root in contact with the soil. When the earth is nearly filled in, a pail of water may be thrown on to settle and wash in the earth around the roots; then fill in the remainder and tread gently with the foot. The use of water is seldom necessary, except in dry weather early in the fall or late in the spring.

MULCHING—When the tree is planted, throw around it as far as the roots extend, and a foot beyond, five or six inches deep of rough manure or litter. This is particularly necessary in dry ground, and is highly advantageous everywhere both in spring and fall planting. It prevents the ground from baking or cracking, and maintains an equal temperature about the roots.

VARIETIES of Apples named are beyond doubt the most profitable for market and best bearers for home use. You run no risk whatever in making your selections from these. Our trees will please you. **Price of Choice Apple Trees, 5 to 7 feet, 20c. each, \$2 per dozen, \$12.50 per 100.**

SELECT SUMMER APPLES

Early Harvest—Medium to large size; pale yellow; tender, with a mild, fine flavor. Tree a *moderate*, erect grower, and a good bearer; a beautiful and excellent variety for both orchard and garden, being one of the first to ripen.

Sweet Bough (Large Yellow Bough)—Large; pale yellow; sweet, tender and juicy. Tree a *moderate*, compact grower and abundant bearer.

Red Astrachan—Large, roundish, nearly covered with deep crimson, over-spread with a thick bloom; very handsome; juicy, good, though rather acid. The tree is very hardy, a *free* grower, with large foliage, and a good bearer; highly esteemed on account of its fine appearance, earliness and hardness.

Yellow Transparent—A Russian apple; medium size, roundish, oblate, slightly conical; skin pale yellow when fully mature; flesh juicy, tender, sprightly, sub-acid; good; a *free* grower.

SELECT FALL APPLES

Fall Pippin—Very large, roundish, oblong; yellow; flesh tender, rich and delicious. Tree a *free* grower, spreading, and fine bearer; one of the most valuable varieties for table or market. An admirable baking apple. Extensively grown in Western New York as Holland Pippin.

Gravenstein—A very large, striped, roundish apple of the *first quality*. Tree remarkably rapid, *vigorous* and erect in growth, and very productive. One of the finest fall apples.

Maiden's Blush—Large, flat; pale yellow with a red cheek; beautiful; tender and pleasant, but not high-flavored. Tree an erect, *free* grower and a good bearer. A valuable market apple.

Oldenburg (Duchess of Oldenburg)—A large, beautiful, Russian apple; roundish; streaked red and yellow; tender, juicy and pleasant. A kitchen apple of best quality, and esteemed by all for the dessert. Tree a *vigorous*, fine grower, and a young and abundant bearer. Very hardy. Succeeds well in the Northwest, where most varieties fail.

Red Bietigheimer—A rare and valuable German variety. Fruit large to very large; roundish, inclining to conical; skin pale, cream colored ground, mostly covered with purplish crimson; flesh white, firm, sub-acid, with a brisk, pleasant flavor. Tree a *free* grower and abundant bearer. This is one of the largest and handsomest apples, and worthy of extensive cultivation.

Wealthy—Originated near St. Paul, Minn. Fruit medium, roundish, skin smooth, oily, mostly covered with dark red; flesh white, fine, juicy, vinous, sub-acid, very good. Tree very hardy, a *free* grower and productive. A variety of much value on account of its *great hardiness* and good quality.

SELECT WINTER APPLES

Baldwin—Large, bright red, crisp, juicy and rich. Tree *vigorous*, upright and productive. In New England, New York, Ontario and Michigan this is one of the most popular and profitable sorts for either table or market.

Ben Davis (New York Pippin, Kentucky Streak, etc.)—A large, handsome, striped apple, of good quality. Tree very hardy, *vigorous* and productive; a late keeper; highly esteemed in the West and Southwest.

Fameuse (Snow Apple)—Medium size; deep crimson; flesh snowy white, tender, melting and delicious. Tree *vigorous*, with dark wood; *one of the finest dessert fruits*, and valuable for market; succeeds particularly well in the North.

For Special Bargains in Fruit Trees See Colored Insert

Golden Russet—Medium size, dull russet, with a tinge of red on the exposed side; flesh greenish, crisp, juicy and high-flavored. Tree a *vigorous* grower, with light-colored speckled shoots, by which it is easily known; hardy, bears well; popular and extensively grown in Western New York and Wisconsin.

Grimes' Golden (Grimes' Golden Pippin)—Medium to large size; skin golden yellow sprinkled with gray dots; flesh crisp, tender, juicy, sprightly, very good to best. Tree hardy, *vigorous*, productive; grown in the South and Southwest.

Hubbardston (Hubbardston Non-such)—Large; striped yellow and red; tender, juicy and fine; a free grower and great bearer. One of the best.

King—A superb red apple of the largest size and finest quality. Tree a *vigorous* grower and good bearer; hardy.

McIntosh Red—Large, roundish, skin mostly covered with bright red; flesh white, tender, sub-acid, sprightly, very good. A handsome apple of fine quality. Tree *vigorous* and hardy.

Northern Spy—Large, striped and quite covered on the sunny side with dark crimson, and delicately coated with bloom. Flesh juicy, rich, highly aromatic, retaining its freshness of appearance and flavor till July. The tree is a remarkably *rapid, erect* grower and a great bearer. Like all trees of the same habit, it requires good culture and occasional thinning out of the branches to admit the sun and air fully to the fruit. Both leaf and blossom buds open a week later than other varieties. *One of the finest late-keeping apples.*

Rambo—Medium size; streaked and mottled yellow and red; tender, juicy, mild flavored. Tree a *vigorous* grower and a good bearer. A widely cultivated and esteemed old variety.

Rhode Island Greening—Everywhere well known and popular; tree spreading and *vigorous*; always more or less crooked in the nursery; a great and constant bearer in nearly all soils and situations; fruit rather acid, but excellent for dessert and cooking.

Roxbury Russet—Medium to large; surface rough; greenish covered with russet. Tree a *free* grower, spreading, and a great bearer; its great popularity is owing to its productiveness and long keeping.

Sutton Beauty—Fruit medium to large. Tree a *free*, handsome grower and productive. One of the most valuable market varieties in Western New York.

Tolman's Sweet—Medium size; pale whitish yellow, rich and very sweet; excellent for cooking. Very productive.

York Imperial—Medium; whitish, firm, crisp, juicy, pleasant, mild, sub-acid. Tree moderately vigorous and productive. Very popular in Pennsylvania.

CRAB APPLES

Price of Choice Trees, 5 to 7 feet, 25c. each, \$2.40 per dozen.

Hyslop's—Almost as large as the Early Strawberry Apple; deep crimson; very popular in the west on account of its large size. Tree remarkably vigorous.

Transcendent—A beautiful variety of the Siberian Crab; red and yellow. Tree a remarkably strong grower.

Far Better Plants Than Any He Ever Bought

NEW YORK, April 26, 1904.

Dear Sir:—

I want to thank you for filling my order with such fine plants. They are far better than any I ever bought before, and the prices were lower too than many others ask for the same varieties.

Yours very truly,

LEVI BELL.

Strongest Plants Ever Seen Around Here

IOWA, April 19th.

Dear Sir:—

I wish to acknowledge receipt of plants. They are the strongest plants I have ever seen around here and are perfectly satisfactory.

OTTO HARM.

Up-to-Date in Quality

OHIO, April 2.

Dear Sir:—

The plants came in good shape yesterday and are up-to-date in quality as your goods always are. It does one much good to handle your goods after seeing some of the false goods sent out by some "Highly Respectable Nurseries."

Respectfully,

SAM T. KENYON.

Exceptional Apple Tree Bargains on Colored Sheet

SELECT PEARS

THE following list includes those varieties which have been well tested and have proven valuable. I can not urge too strongly the following suggestion: When pear trees are heavily laden, the fruit should be thinned when about one-third grown; else the fruit will be poor and the trees injured.

PRICE OF PEAR TREES

Standard Pears, 5 to 7 feet, 30c. each, \$3 per doz., \$22 per 100.

Dwarf Pears, 3 to 5 feet, 25c. each, \$2.40 per doz., \$15 per 100.

SUMMER PEARS

Bartlett—One of the most popular pears; large, buttery and melting, with a rich flavor. A *vigorous*, erect grower; bears young and abundantly.

Clapp's Favorite—A splendid pear, resembling the Bartlett, and ripening a few days earlier; the tree is hardy and *vigorous*.

Tyson—Rather above medium size; melting, juicy, sweet. Tree a very *vigorous* and rapid grower; bears abundantly every year; one of the best summer varieties.

Wilder—Medium or rather small, regular in form; greenish-yellow with a brownish-red cheek. Tree a *vigorous* grower and great bearer.

AUTUMN PEARS

Duchess—One of the largest of all our good pears. As a dwarf it is one of the most profitable of market pears.

Flemish Beauty—A large sweet pear. Tree very hardy, *vigorous* and fruitful; succeeds well in most parts of the country.

Howell—One of the finest of American pears. Large, yellow and handsome. Tree very *vigorous*, hardy and productive.

Keiffer—Large; skin rich golden yellow; flesh slightly coarse, juicy, melting, with a pronounced quince flavor. Tree very *vigorous* and an early and great yielder.

Seckel—The standard of excellence in the pear; small, but of the highest flavor. Tree a stout, *slow*, erect grower.

Sheldon—A pear of the very first quality. Tree *vigorous*, erect and handsome, and bears well.

KEIFFER PEAR
Planted in the Spring of 1901

WINTER PEARS

Anjou—A large, handsome pear, buttery and melting; keeps into midwinter. Tree a *vigorous* grower and good bearer.

Clairgeau—Very large, handsome and attractive; flesh yellowish; keeps sound a long time after being gathered. Tree a *free* grower and an early bearer; valuable for market fruit.

Lawrence—Size medium to large; golden yellow. Tree a *moderate* grower and an abundant bearer.

Winter Nelis—One of the best early winter pears; medium size; dull russet with a rich flavor. Tree a *slender*, straggling, but *free* grower.

Vermont Beauty—Medium size; yellow, covered on sunny side with bright carmine red; rich, juicy, subacid. Ripens immediately after Seckel. Very hardy.

Will Recommend You

New York, April 19, 1904.
Dear Sirs:—I received trees all O.K. and think they are good ones I will recommend you.

Yours respectfully,
F. B. Chapman.

Pear Trees are Extra Fine

R.F.D., No. 1, Ohio, May 3, 1904.
Dear Sir:—Trees and plants were nice and all right and many thanks for the fine lot of plants. The Pear trees are extra fine looking, so you know I am well pleased. Yours truly,
Anna Janson.

Fair Dealing

New York, May 31, 1904.
Dear Sir:—The plants came today all O.K. I wish to thank you for your prompt and fair dealing.
Yours truly, Chauncey Jewell

Well Rooted Plants

Lackawanna Co., Pa., Apr. 29, 1904.
Dear Sir:—I must commend you for your well-rooted plants, the best I ever saw and your style of packing is very good. Yours truly, Olney Pratt, Sr.

SELECT CHERRIES

Cherries succeed well in dry soils. Every Fruit Garden should have one or more cherry trees. I do not believe there is a single town in the United States where the market has been well supplied with the delicious fruit. The demand has always been greater than the supply. Farmers and fruit growers need not fear to plant this fruit largely.

Black Tartarian—Very large, purplish black. Tree a remarkably *vigorous*, erect and beautiful grower. One of the most popular varieties. **50c. each, \$5 per doz.**

Napoleon—A magnificent cherry of the largest size; pale yellow, with a bright red cheek. Tree a *vigorous*, erect grower; ripens late; valuable for canning. **50c. each, \$5 per dozen.**

Dyehouse—A very early and sure bearer; ripens a week before Early Richmond. Very productive. **Price, 50c. each, \$4.50 per dozen.**

Early Richmond—An early red acid cherry; very valuable for cooking early in the season. Tree a *free* grower, hardy and healthy. **Price, 50c. each, \$4.50 per dozen.**

Montmorency—A beautiful, large, red, acid cherry; larger and finer than Early Richmond, and fully ten days later. It can be recommended as a variety of great value. Valuable for canning and preserving. Tree a *free* grower. **Price, 50c. each, \$4.50 per dozen.**

SELECT PLUMS

The Plum is one of our most healthful and useful fruits, and when carefully and judiciously cultivated, one of the most profitable also. The curculio is its chief enemy, but if it is combated with skill its ravages can be reduced to a minimum. As soon as the blossoms are fallen, spread two sheets under a tree, and with a hammer strike a hard blow on the stub of a limb sawed off for that purpose. Kill the insects which drop on the sheets. Collect all the fallen fruit and feed to swine, or burn. Keep this up every morning before sunrise for two weeks, and you will get a good crop of fruit.

The new Japan Plums are enormously productive and combine many desirable qualities.

Price of Plums, 5 to 7 feet, 50c. each, \$4.50 per dozen.

Abundance (Botan)—One of the oldest and best known Japanese varieties; hardy and productive. Fruit large, lemon yellow, with heavy bloom; good quality

Bradshaw—A very large and fine early plum; dark violet red. Tree erect and *vigorous*; valuable for market.

Burbank—Best and most profitable among growers for market; ripens ten to fourteen days after Abundance. Tree hardy, sprawling, vigorous grower, unequalled in productiveness; bears young. Fruit large, excellent quality; cherry red with lilac bloom.

Fellemborg (French or Italian Prune)—A fine late purple plum; fine for drying. Tree a *free* grower and very productive.

German Prune—Medium; oval; blue, juicy, rich. Tree *vigorous* and very productive.

Grand Duke—A valuable late plum; as large as the Bradshaw, and entirely free from rot. One of the best late plums for market.

Imperial Gage—Rather large; oval; greenish; flesh juicy, rich and delicious; parts from the stone. One of the best plums.

Lombard—Medium size; oval; violet red; flesh yellow. Tree a *vigorous* grower, peculiarly adapted to light soils; very hardy.

Red June—Recommended as "by all odds the best Japanese Plum, ripening a week before Abundance." One of the vigorous, upright growers; productive; fair size, vermilion red; pleasant quality.

Wickson—Fruit remarkably handsome, very large, long, heart-shaped, color deep maroon red covered with white bloom; flesh firm and meaty, yellow, rich and aromatic; cling; pit small. Tree an upright vigorous grower. Excellent keeper and shipper. Is being planted largely for market.

Yellow Egg—A very large and beautiful egg-shaped yellow plum; a little coarse, but excellent for cooking; very productive.

Fruit Tree Bargains for All on Colored Sheet

SELECT PEACHES

To secure healthy, vigorous and fruitful trees and fine fruit, the following points must be well attended to in peach culture: 1st. Keep the ground clean and mellow around the trees, and give it an occasional dressing of wood ashes. 2d. Keep the heads low—the trunks ought not to exceed three feet in height. 3d. Attend regularly every spring to pruning and shortening the shoots of the previous year's growth. This keeps the head round, full, and well furnished with bearing wood. Cut weak shoots back about one-half, and strong ones one-third, but see that you have a sufficient supply of fruit buds. Sickly and superfluous shoots should be cut clean out.

NOTE—In planting peaches, it is of the highest importance to cut back the trees severely. The stem should be reduced about one-third and the side branches cut back to one bud. This lessens the demand upon the roots, and enables the remaining buds to push more vigorously. Most failures in newly-planted orchards may be ascribed to a non-observance of these directions.

Prices of Peach Trees, 4 to 5 feet, 20c. each, \$1.80 per dozen, \$12 per 100.

Carman—A superb Peach of the Elberta type, new, but already a leader for general market and long-distance shipping. Quite large, creamy yellow, with deep blush; skin very tough, protecting the tender, spicy, juicy flesh, which distances in quality that of nearly all other Peaches. The tree is very hardy in bud, and grows and produces well, ripening its profuse crops.

Alexander—Medium to large size; rich red, juicy and sweet. Tree *vigorous* and productive; one of the largest and best of the extra early varieties; valuable for market.

Crawford's Early—A magnificent, large, yellow peach, of good quality. Tree exceedingly *vigorous*; its size, beauty and productiveness makes it one of the most popular varieties.

Crawford's Late—A superb yellow peach; very large, productive and good; ripens here about the last of the peach season.

Crosby—Fruit medium, roundish, bright orange yellow; good in quality. Ripens between Crawford's Early and Late.

Elberta—Originated in Georgia a few years ago and has proved to be one of the most valuable of the newer varieties. The

fruit is large; flesh yellow, juicy; quality good, though not quite equal to the Crawford. It bears transportation well, and, taken all in all, is a variety of promise.

Foster—A large yellow peach, resembling Crawford's Early, but of better quality. Ripe about the same time as Crawford's Early.

Mountain Rose—Large; flesh white, juicy, very good; free stone. Very productive. An excellent early market variety.

Rivers (Early Rivers)—Large; color creamy white, with a delicate pink cheek; larger than Louise. One of the finest of the early peaches for amateurs.

Waterloo—Medium to large; skin pale whitish green in the shade, marbled with red and crimson in the sun; adhering considerably to the stone.

Wheatland—Large, roundish; skin golden yellow, rather firm, fine quality. Ripens between Early and Late Crawford. Tree *vigorous* and healthy.

Yellow St. John—A superfine early yellow freestone, nearly as large as Crawford, as finely colored and of even better flavor. Its round, showy fruits always attract attention and sell well. A fine dessert Peach. The tree bears while still small, and abundantly afterward.

SELECT QUINCES

Price of Quince Trees, 3 to 4 feet, 50c. each, \$5 per dozen.

Apple, or Orange—Large; roundish, with a short neck; of a bright golden yellow color. Tree has rather slender shoots and oval leaves; very productive. This is the variety most extensively cultivated for the fruit.

Champion—A good variety, but ripens too late for this region.

Meech's Prolific—Prized highly in some sections.

Rae (Rae's Mammoth)—A very large and fine variety of the Orange Quince. A strong grower and productive. We consider this the best of *all the quinces*.

See Colored Insert for Some Splendid Tree Bargains

HARDY ROSES

WE GIVE much space to Rose-growing. It is one of our leading specialties. The demand for Roses of all kinds increases so greatly every year that we now find it necessary to devote more space to them. Only the hardier Roses are given a place in this catalogue.

POINTS IN ROSE CULTURE

The Rose delights in an open, airy situation, unshaded by trees or buildings. All the types are partial to clay loam, but will do well in any ordinary soil if enriched with well-rotted barnyard manure. Dig the soil up thoroughly to the depth of twelve or fifteen inches, as rose roots penetrate deep when they have a chance. Do not raise the surface of Rose beds above the surrounding surface. They suffer less from drought when left level with the turf. After the plants have been set out, keep the soil loose to the depth of an inch or two, by frequent stirrings. An occasional soaking with weak manure water is a great help to Roses of all sorts.

HARDY HYBRID PERPETUAL ROSES

These are the June Roses, so admirably suited for garden culture, the formation of Rose beds, hedges and permanent plantations, where hardy varieties of Roses are desired. They are of easy culture and luxuriate in deep rich soil. They are benefited by mulching of leaves or strawy manure placed around the roots in fall. Prune according to the habit of growth, cutting back close all weak shoots, and shortening the long canes to a convenient length.

In May and June these Hardy Garden Roses are brilliant with large, perfumed flowers of richest colors, far excelling the Everblooming class in size and vivid effects. Many of those offered in the list below give occasional flowers through the summer, and again in autumn, perfect even finer blossoms than those of June.

Showing American Beauty and Gen. Jacqueminot, two years old, field-grown Roses. The kind we send out.

Price of strong two years' field-grown plants (see cut) **25c. EACH, \$2.50 PER DOZEN.** (2 to 3 feet high.)

NOTE—If sent by mail add 5c. to each plant.

Two Important Points

Wood's Rose stock is all two years' field-grown with extra fine roots.

We remind you of these two points, as some firms offer Roses at lower prices but do not tell you the size of the plants. When you buy **WOOD'S ROSES** you know just what you are getting.

OUR ROSE BARGAINS, (Colored Sheet)
WILL PLEASE YOU

CLIO

Clio—A Rose of perfect form and finish, with broad, thick petals, high, full center, beautiful from pointed bud to fully opened flower. The color is a delicate satiny blush, with slightly deeper center. The plant is strong and blooms freely, displaying its great flowers boldly on good stems against large, rich leaves.

Alfred Colomb—A superb brilliant crimson rose, of very large, full form, extremely fragrant; blooms freely and grows well.

Anne de Diesbach—Very large and fragrant flowers of a rich carmine color. A notably hardy and superior garden Rose.

Baron de Bonstetten—Large, deep full flowers of dark crimson-maroon. A splendid, highly scented flower.

Baroness Rothschild—A grand pink Rose, of full cupped form and exquisite pale pink color. Short-jointed, very hardy, late-blooming, scentless.

Duke of Edinburgh—Brilliant crimson-scarlet, shaded with maroon.

Far Beyond my Expectations

Ohio, May 24, 1904.
Dear Sir:—I received order all O. K. They came through in first-class order and are doing fine. Was greatly pleased with same, indeed they were far beyond my expectations to come the distance they did. Yours, BURT B. BRADBURY

SPECIAL OFFER : 12 beautiful, hardy, perpetual Roses offered on Bargain Insert for \$2.50 prepaid.

Largest and Best Rooted Roses

Cleveland, O., Nov. 1, 1904.
Dear Sir:—I wish to thank you for those fine Roses you sent me last April.

Your Roses are the largest and best I have ever bought. I never saw Roses having such roots and I was surprised to see them all bloom in June. The LaFrance bloomed all summer.

I wish you would send me one-half dozen of your catalogues so I can give them to my friends.

Yours very truly,
MRS. REUBEN WALKER.

Crested Moss—Deep pink colored buds, surrounded with a mossy fringe and crest. Very beautiful rose.

Coquette des Alpes—A free-blooming Rose of medium size; white, tinged with pale rose. Exceedingly dainty and attractive

AMERICAN BEAUTY

American Beauty—One of the largest and most beautiful of the hardy roses. Flowers very large and double, and delightfully fragrant. Color a rich rosy crimson. Plant a strong grower and continuous bloomer. It will make a much stronger growth if not allowed to bloom the first summer. Pinch off the larger portion of the buds—better, all of them. This will not be necessary the second season, as the plant will then be strong enough to make both growth and bloom.

Earl of Dufferin—Rich crimson-maroon, with dark and velvety shadings. The flowers are large, full, globe-shaped, thick-petaled and very fragrant. Grows well and blooms freely, with many handsome buds in autumn. One of the finest dark Roses.

General Washington—One of the freest blooming Roses of this class. The flower is perfectly double, of a beautiful, soft scarlet shade, sometimes shading in glowing crimson

John Hopper—A fine and free-blooming old sort, with large, full, handsome flowers of fresh, bright rose.

General Jacqueminot—The famous bud and forcing Rose, quite as well adapted for garden culture by its fine, hardy habit. Its unusually fragrant flowers are a brilliant glowing crimson, not very full, but large and extremely effective.

COQUETTE DES BLANCHES

Coquette des Blanches—A finely formed white rose, with shell-shaped petals evenly and daintily arranged. Of free growth and bloom, with fine dark leaves and almost thornless stems. Newly expanded flowers and sometimes tinted with blush.

Fine Nursery Stock

New York, May 23, 1904.
Dear Sir:—I wish to thank you most cordially for forwarding the fine bundle of shrubs and nursery stock, which have come safely to hand.

Sincerely,

CHARLES MERRILL.

Trees, Vines and Bushes are Fine

The Maples, N. Y., May 2d.
Dear Sir:—The box of trees, etc., arrived last Saturday and were cared for Monday. The trees, vines and bushes are fine. I am well pleased.

Yours truly,

WM. P. LEGGETT.

JUBILEE

Jubilee—A notable Rose of recent introduction, that ranks among the best dark sorts. Deep, flashing crimson, with shadings of velvety maroon; very large, and quite fragrant. Of compact, bushy growth, with good, dark foliage and long flower-stems.

Mabel Morrison—A grand white rose, similar to Baroness Rothschild in all save color.

Magna Charta—A hybrid China that is very fine early in the season; bright rose, large and full.

Madame Plantier—Pure white, above medium size, full. Produced in great abundance early in the season. One of the best white roses for hedges and for massing in groups.

Marshall P. Wilder—One of the best dark red Hybrid Perpetuals; the flowers are large and perfect in form, on good length of stems, making them very desirable for cut flowers; color bright cherry red, changing to crimson.

Marie Van Houtte—Plant Marie Van Houtte if you wish a rose that will bloom continually and furnish large, well shaped, sweet scented bloom. It succeeds anywhere and in any soil; an exceedingly strong, vigorous grower. Its color is creamy white, with the outer petals outlined bright rose; occasionally the entire flower is suffused with light pink.

Francois Levet—Large flower of fine form, on straight stiff stems; bright clear rose color, a splendid variety.

PAUL NEYRON

Paul Neyron—The largest Rose in cultivation, sometimes called the Peony Rose; color bright, fresh cerise-red. The plant makes a strong, healthy growth, and has clean, glossy foliage; blooms almost without intermission from June until late October.

Marchioness of Londonderry—Ivory-white flowers of great size and substance, perfectly formed, on stout stems; highly perfumed; free blooming.

Margaret Dickson—A large and handsome white Rose, of extra-vigorous growth. Its large petals are thick and shell-shaped, of good substance, tinted.

Prince Camille de Rohan—A velvety, blackish crimson Rose, of deep, distinct shade; large, full, very handsome.

Persian Yellow—Bright yellow, small, nearly full. It is desirable to grow more than one plant, and by pruning one plant one year, and the other plant the next year, annual crops of flowers may be had.

Mrs. J. H. Laing—An exceptionally handsome and free-blooming Rose, of vigorous growth and fine habit. The color is

a soft and delicate shade of pink; the flower is large and well formed, very fragrant and produced on good stems. A variety of especial value, as it blooms continuously in the open ground, and is also excellent for forcing, the buds selling at high prices.

Mrs. R. G. Sharman-Crawford—Grandly formed flowers of a warm, delicate shade of pink; pale flesh on the outer petals, deep rose in the center. The large, thick petals are finely imbricated; the flowers are produced on splendid stems. The plant makes a vigorous growth and blooms from early summer until autumn.

Ulrich Brunner—A Rose of beautiful form and finish, very striking from its color of brilliant cherry-crimson. The bush is vigorous, blooming continually in the open air, and displaying its superb, glowing flowers on good stems.

LA FRANCE

La France—Delicate silvery Rose, shaded with cerise pink, often silvery pink, with peach shading, very large, double and of superb form. It flowers continually throughout the season. None can surpass the delicacy of its coloring.

Minnesota Growers More than Pleased

April 30, 1904.

Dear Sir:—I am more than pleased with those extra fine plants you have sent me. I shall with pleasure recommend you to anyone in need of anything in your line.

Respectfully,

CHAS. J. SCHROEDER.

More than Full Count

Kansas, Oct. 21, 1904.

Dear Sir:—I received the plants in fine condition and more than full count. They are the finest plants I ever saw.

Respectfully,

L. J. LAMB.

HARDY CLIMBING ROSES

Crimson Rambler—Without doubt the greatest acquisition of a lifetime. The sale for a single season reaches enormous numbers, yet the supply is scarcely equal to the demand. It is perfectly hardy; has never killed back in the slightest degree on our home place, where the mercury frequently registers twenty degrees below zero. Very vigorous in growth, often making shoots 10 to 12 feet long in one season, with canes one-half inch in diameter. May be grown in any position, pegged down to the ground in beds, trained to porch pillars, the side of a building or on trellises. Flowers glowing crimson, produced in large panicles, many measuring 9 in. long and 7 in. across, entirely covering the plant. See cut. Strong two-year plants, 35c. each, \$3 per dozen.

Baltimore Belle—Very double blush white, in large clusters, completely enveloping the whole plant with bloom. Price, 25c. each.

Prairie Queen—An old standard variety, and one that will always be popular. No collection of hardy climbing roses is complete without it. Bright rosy red, large, compact and globular flower. Price, 25c. each.

Seven Sisters—A splendid rose, blooming in clusters; crimson, changing all shades to white. Price, 25c. each.

Tennessee Growers are Pleased

March 26, 1904.

Dear Sir:—I received plants yesterday all O. K. Am well pleased with them also your mode of packing.

C. B. COLEMAN.

He is Well Pleased

Arkansas, April 17, 1904.

Dear Sir:—The vines and plants I ordered from you were received in good condition and I am well pleased with the same.

Yours truly,
I. W. GREGG.

From California

Los Angeles, Cal., March 29, 1904.

Dear Sir:—The berry collection at hand just as fresh as the day they were shipped and in good perfect order. Thanking you for the prompt delivery, I remain, Yours very truly,

T. W. EASTON.

CRIMSON RAMBLER

PANICULATA CLEMATIS

NOTE—If sent by mail add 5c. to each plant.

Clematis Paniculata (New Sweet-Scented Japan Clematis)—No recent introduction has met such ready sale and given so perfect satisfaction. Grows and thrives anywhere; a very rapid grower, profuse bloomer. Flowers pure white, borne in large clusters. converting the plant into a perfect mass of white. Its extreme hardiness, brightly fragrant flowers make this one of the finest hardy climbing plants in cultivation. **Extra strong 2-year plants, 25c., five for \$1.**

Hydrangea Paniculata Grandiflora—Too well-known to require description. Probably the most popular of all shrubs. Blooms in August and September, when we have few shrubs in bloom. Flowers white, in pyramidal panicles often a foot in length. Excellent plant for masses or single specimen. **Large plants, 25c. each, \$2.50 per dozen.**

HYDRANGEA PANICULATA GRANDIFLORA

**Our Colored Insert

Read What Fruit Growers Say

Sold \$62 worth from 200 Pomona Currant Bushes

Illinois, July 6, 1904.
Dear Sir:—This is my second picking since I set out the Pomona Currants you sent me and I do not think they can be beaten. The fruit is as large as any and clusters hang thick and full and from five to six inches long. I did not lose a single plant out of 200. I got as high as six quarts from one plant and sold \$62 worth this season.

Yours truly,
VOEL VOELLNEGER.

From Washington

Washington, April 10, 1904.
Dear Sir:—Your shipment of March 21st arrived in good order.
Respectfully,
MRS. F. M. STASON.

As Good as any I ever Bought

Illinois, April 25, 1904.
Dear Sir:—My order for currants received in good condition and the plants are as good as any I ever bought.
Respectfully,
C. KNAPP.

Lost Three out of Six Hundred

Pennsylvania, July 22, 1904.
Dear Sir:—My raspberry and strawberry plants that I got of you this spring are doing finely and I only lost three out of six hundred.
MRS. ALICE AYERS.

Extra Good

Virginia, April 9, 1904.
Dear Sir:—Stock received in fine condition and are extra good.
Yours truly,
J. N. ROHRMAN.

Nice Thrifty Plants

Boone Co., Ky., Oct. 9, 1904.
Dear Sir:—The strawberry plants came in good condition and am well pleased with them. Nice thrifty plants.
Respectfully yours,
W. T. SNYDER.

Well Rooted Bushes

Wisconsin, March 27, 1904.
Dear Sir:—The 150 Pearl Gooseberries received were fine bushes and well rooted.
Yours respectfully,
MICHIGAN ELLIOTT.

Best he bought in Fifteen Years

Iowa.
Dear Sir:—Your plants at hand. I have been buying all kinds of plants for the past fifteen years. I must say that yours were better than the best I have ever bought in fifteen years. I will order from you in the spring, as I think it would be too late now for fall planting.
J. TAVEMER.

Fresh as When Dug

Massachusetts, April 30, 1904.
Dear Sir:—I am in receipt of my box of strawberry plants all fresh and nice as when dug, good count and in every way satisfactory. Shall know where to send when in want of anything in your line.
Yours truly,
JOHN E. DAINTY.

21,500 Gooseberries and Currants

New Jersey.
Dear Sir:—The 21,500 Gooseberries and Currants bought of you this spring are all doing finely; not over two hundred lost in the entire lot.
E. S. HOLMES.

Prompt Attention

Massachusetts, Oct. 14, 1904.
Dear Sir:—We beg to thank you for your prompt attention to our order. The plants reached us in season and in good condition.
Yours truly,
W. B. WHITTIER & Co.

Well Pleased with Them

Pennsylvania, Nov. 29, 1904.
Dear Sir:—We unpacked the boxes of Grape Vines, Currants and Rhubarb the other day. We are well pleased with them.
Yours truly,
A. W. ROOT & BRO.

Every Plant Grew

New York, March 8, 1904.
Dear Sir:—The Columbian Raspberry plants we received from you last spring were the best I have ever seen from any nursery. Every plant grew, making a strong, healthy growth the first year.
Yours respectfully,
W. V. LANCASTER.

WOODLAWN NURSERIES—WHOLESALE GROWERS OF SMALL FRUITS, PLANTS, ETC.

American Fruits Publishing Co.,

ROCHESTER, N. Y., Nov. 1st., 1904.

GENTLEMEN:—I recommend **AMERICAN FRUITS** to all who are in any way interested in the production or handling of fruit. The information in its reading columns is very comprehensive, covering the whole field and cannot fail to be valuable. Further, my experience as an advertiser in its columns warrants me in advising its use by those who wish to do effectual advertising in this field.

Yours very truly,

ALLEN L. WOOD.

OVER.

AMERICAN FRUITS

was established on lines so comprehensive that publishers of other journals were amazed at the undertaking. Nothing like it had ever been proposed. Heretofore the fruit grower has had to depend upon a peach, apple, nut, or small fruits specialist, covering but a limited territory. Now he may have the news and the experience of growers and shippers in every State in the Union, in Canada, Nova Scotia, Mexico, Cuba, Hawaiian Islands, and the growth of American Fruit interests in Great Britain and Europe, all for the price of the cheapest and most limited publication heretofore offered.

From the outset the attention of the greatest horticulturists and pomologists of the country was attracted by this great undertaking and letters from every quarter of the continent poured in upon **AMERICAN FRUITS**, expressing in the strongest terms wonder at the result.

HAVE YOU SEEN IT?

HAVE YOU READ IT?

If so, send us 50 cents by return mail and receive it regularly for one year; or \$1.00 and receive it for **THREE YEARS**.
